## Toshiba Headset Choices

Jan 23rd, 2017

### OVERVIEW:

Toshiba does not make headsets directly but does partner with a leading headset manufacturer GN-Netcom. They start with generic GN Network Headset models and specifically “optimize” them for Toshiba Telephones. These “optimized” headsets are only available through the authorized Toshiba Telecom Dealer Network (like us). They offer superior sound, better transmit and receive levels, and easier usage with connections to Toshiba phones without lifting robots or other generic solutions with mediocre results. All Toshiba wireless model offer 300 ft or more (no obstructions) range. Because the “optimized” versions plug directly into a Toshiba headset jack (NOT to the handset cord) you can wireless model users can choose to use the handset or headset (or switch during a call) very easily.

Toshiba only offers professional grade headsets that will typical serve 5 to 10 years so cost is more easily justified.

There are several considerations in choosing a headset for your Toshiba phone and many models to choose from:

**Step 1:** Choose Wireless (standard) vs Wired (economy) OR combo Toshiba Phone/ PC / and Cellphone.

**Step 2:** Choose Wearing Styles (Headband, over-the-ear, behind the neck, under-the-chin, etc.).

PSB Recommends to use the optional AMP with wired headsets (requires usb port for power or \$30each power cube)

### MODEL SUMMARY

NC = Noise Cancelling Mic, H=Headband, EH=Earhook, BN=Behind Neck, NB=Neck Band, OE=Over Ear, BE=Behind Ear

Wireless: Allows remote answer/hangup if you can hear your phone ring (optional remote ringer on some).

Wired: Must use Release key to hang up. Optional Amp box \$139 for more volume control & mute (for old phones).
